

The main ideas are:

- Only on part to replace
- Easy to clean (big angles help the resin to fall)
- Other possible improvement: use the cavity inside the Main Plate as a tank of resin

Steps:

- 1) Put Manually the Main Plate on the screen
- 2) Fix the Top support
- 3) Go to the Home position to center the both
- 4) Go up the Top support
- 5) Put the glue or the polyurethan resin inside the big hole of the Main Plate
- 6) Return to the Home position and wait the complet gluing
