3 seconds ago. If you like building farm and city, you should try Township mobile game. This game is aimed to provide a better farming experience to all players. In the game, you have a small plot of land where you can turn down your crops and buildings. You need to try your best to expand your farm in a short time. In order to make more money, you need to sell more advanced products. As your farm grows, you will have more opportunity to try new things such as city building. To help you have a good start, we share you latest Township cheats and tips.

Try to grow more crops as long as you can. Though your started resource is limited, you should keep planting crops until it reach its limit. By doing this, you will be able to yield more profit from your crops. Sometimes, the system will alert that your crops have been reach its limit amount. You can sell other useless things to expand the planting limits. As crops will grow fast, so you must always check their growing stats, in order to not let them drop before your harvest them.

Once you have idle lands, you should have plans to make more structures (such as dryers and dumpling machines) on it. Because you need these machine to process your raw materials which are produces by your farm. If you want to produce more products, you have to make sure your production queues are always busy. As you know, raw materials processing usually take time to be done, so you'd better handle more raw materials as long as you can.

Cash and coins are the most important currency in this game. You need them to upgrade your produce machine and expand your farm. So finding a reliable way to earn cash and coins fast is the key to succeed in the game. Generally, you can buy them all in game store with your money. However, not every player want to use their money in game. The replaceable option is making use of Township hack 2019. Once you run it smoothly, you will get cash

and coins as many as you wish in your game account within a few seconds.
