

# R Ygold Download Rar

Page 11 of 12  
DD14-5391

- o "R@ygold" is a series of child pornography photos that pedophiles have been trading for at least the last 15 years that I know of.
- o "PTHC" is an acronym that pedophiles use that stands for Preteen Hard Core child pornography.
- o "Hussyfan" is a phrase that is also often used in the names of child pornography pictures and videos.
- **File slack (BOOKMARKS #62-63).** File Slack is data in the space between the end of a file and the end of the disk cluster it is stored in. It occurs naturally because data rarely fill fixed storage locations exactly, and residual data occur when a smaller file is written into the same cluster as a previous larger file. Data found in "file slack" is typically parts of old "deleted" files. Inside Reyna's file slack, I often found titles of pictures and videos with obvious child pornography names. An example would be a video file named "14 y.o. Lolita Rape And Crying With Feet Bound - Bd Sm BdsM Torture Slave Bondage(17Min-Mid Q).3g2," (BOOKMARK#63). Often the files with obvious child pornography type names specifically indicated they had come from the file path of G:\Azureus Downloads (BOOKMARK #62). Azureus is a peer-to-peer file sharing program which allows users around the world to exchange files over the Internet.
- **Pagefile.sys file (BOOKMARK #64).** Pagefile.sys is a windows system file, and acts as swap file to improve performance. When a Windows computer needs to load more data that it's using into RAM than it has room in RAM for, it writes the over-flow data out to the hard-drive in the Pagefile.sys file. In Reyna's pagefile.sys file, I saw a reference to "H:\Azureus Downloads\Hussyfan Preteen Anita [Angelic Porno Preteen].zip."
- **User reubenrr's ntuser.dat.LOG1 file (BOOKMARK #65).** The ntuser.dat.log1 file contains a log of changes made to the registry files for a user's profile account. Reyna's ntuser.dat file shows data in the file path of G:\Azureus Downloads\ (kleuterkutje) (ptsc) (pthc) (kingpass) (hussyfan) (kinderkutje) (valya) (pedo) (babyshivid) r@ygold 3 yo 4 yo 5 yo 6 yo 7 yo!!! 2009 NN play with me.rar." (BOOKMARK #65).
- **ACDSee ImageDB.ddf file (BOOKMARK #66).** This is a database file inside the picture viewing software called ACDSee, showing files opened in the program. This database does not make any reference to Azureus or what file paths pictures came from, it just lists the names of pictures that were viewed, with things in the titles like "5yr Girl darkcollection Child Pede Porn Sex childfugga childlover . . ." and "... Preteen KDQUALITY NEW 2005 CHILD PORN ILLEGAL PEDOFILIA ptsc pthc . . ." (BOOKMARK #66). There were at least many hundreds of pictures with similar sounding titles recorded in this database, perhaps thousands.
- **Application.evtx file (BOOKMARK #67).** These files are used by Windows to record events - information messages, warning messages and error messages. This file recorded the names of

I certify (or declare) under penalty of perjury under the laws of the State of Washington that the foregoing is true and correct. (RCW 9A.72.085.)
