

## FULL ReCap 2017 Crack

### Repairs & Maintenance | Paving Best Practices

common) or thermoplastic and is applied using a compressed air striping machine. The lifespan of the paint can range from six months to three years, depending on the weather conditions, type of traffic and paint type.

No matter the method or equipment, a well-striped parking lot creates a set number of parking spaces. For sustainability purposes, reducing the size of the spaces can create more space for trees for natural shading. A parking lot management's engineering team can help create a sustainability plan.

#### ADA Compliance

The Americans with Disabilities Act (ADA) of 1990 and its subsequent revisions ensure that all persons are provided accessible accommodations when entering, exiting and parking at facilities. Meeting both federal and state ADA requirements with regard to parking and entryways demonstrates good corporate citizenship and employee inclusion. It is also helps avoid penalties and fines. A good parking lot management provider will identify risks and gaps in a lot's compliance and recommend changes needed to bring a lot into alignment with the current federal and local standards.

As you look at the goals for this year, don't forget to consider your parking lot. Work with a parking lot management company that takes time to understand your goals, knows the applicable regulations, has access to the proper materials and uses sustainable paving practices. ■

Cherise Knable is the Vice President of Marketing for KMI Total Pavement Management.
