

Cpanel Whm 11 34 Nulled 191 Build Utorrent 32 Exe

The screenshot shows the WHM (Web Host Manager) interface for EasyApache 4. The top navigation bar includes 'WHM', 'News', 'Change Log', and 'Logout (root)'. The system information at the top right indicates 'CENTOS 6.7 x86_64 standard - cpanel WHM 11.51.9999 (build 116) [TEST BUILD] Load Averages: 0.17 0.04 0.02'. The main content area is titled 'EasyApache 4' and features a 'Profile' section with several options:

- All PHP Options + OpCache (cPanel)**: This is the default cPanel profile plus every PHP option (sans recode and zendguard due to incompatibilities). This package can host multiple sites and users. Includes Apache 2.4, PHP 5.4, PHP 5.5, PHP 5.6, and All PHP Opts.
- All PHP Options + ZendGuard (cPanel)**: This is the default cPanel profile plus every PHP option (sans recode and opcache due to incompatibilities). This package can host multiple sites and users. Includes Apache 2.4, PHP 5.4, PHP 5.5, PHP 5.6, and All PHP Opts.
- cPanel Default (cPanel)**: This is the standard Apache package with up-to-date PHP and modules. This package can host multiple sites and users. Includes Apache 2.4, PHP 5.4, PHP 5.5, and PHP 5.6.
- cPanel Default + MPM ITK (cPanel)**: This profile includes the modules from the Basic profile but replaces MPM Worker with MPM ITK to further increase security for your server. MPM ITK creates a more secure environment than Mod Ruid2, but uses more resources. Includes Apache 2.4, PHP 5.4, PHP 5.5, PHP 5.6, and MPM ITK.
- No PHP (cPanel)**: This Apache web server is beneficial for static content and secure servers. This server does not use PHP support. Includes Apache 2.4 and No PHP.
- cPanel Default + RUID2 (cPanel)**: This profile includes the modules from the Basic profile. This configuration utilizes Mod Ruid2 to improve the security of your server. We recommend that you select this profile if you use either the CGI, DSO, or the suPHP PHP handlers.
