

## Crack Plate N Sheet Professional 4 Keygenl

**Properties**

**Press Lines**

 Number of Press Lines:

Set the number of points used to define the profiles. More points make a smoother shape.

**Seam Position**

Angle of Seam:  Change the position of the seam by entering an angle from 0 to 360

**Half Pattern Options**

☒ Full Pattern Use this option when a half pattern is needed.

☐ Half Pattern Use caution if the shape is not symmetrical or if the Angle of Seam is not 0.

**Mirror Pattern**

☒ Normal The normal orientation is that the press lines on the pattern will be on the inside of the shape.

☐ Mirrored Use this option to reverse the pattern.

**Template Type**

☒ Mean Thickness Use this option when the template is to be from cut flat plate and rolled or pressed.

☐ Wrap Around Use this option when cutting from pipe. The pattern wraps around outside of the pipe.

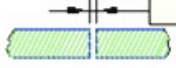

**Material Properties**

Select Material:

NOTE: The selected material does not affect the shape of the item. It is used only to calculate weight and cost. Click the "Mass Properties" button on the toolbar to find the weight and cost of the shape.

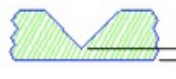

The materials are defined in the Material Editor. Select from the 'Tools' pull-down menu to enter new materials or to adjust cost and weight values.

**Pattern Spacing**

Pattern spacing is the gap between each piece when the pattern has multiple parts, such as a segmented bend.

**Router Groove**

Router groove is used when folding some plastic material and specifies the remaining material at the bottom of the groove. Zero (0) means no groove.
